— D. Appleton & Co. announce "A Text-Book in Psychology," translated from the German of Johann F. Herbart. The central idea of the author's "attempt to found the science of psychology on experience, metaphysics, and mathematics," is *appception* — recognition and comparison of features of an object with which we are familiar — in contradistinction to *perception*, in which an object is merely presented to our senses. The book makes the eighteenth volume in the International Education Series.

— A. C. Armstrong & Son, in conjunction with Elliott Stock, London, will publish the Camden Library, a series of volumes "concerned with the antiquities of Great Britain," and edited by G. Laurence Gomme and T. Fairman Ordish. The first volume, just ready, deals with the "Antiquities and Curiosities of the Exchequer," containing numerous illustrations from original MSS. and the various records preserved in the Public Record Office. Antiquities of the stage will be looked after in "Old London Theatres," and yet other volumes will be entitled "English Homes in the Past," "Monastic Arrangement," "English Armor," "Folk-Lore," "Church Plate," "The Streams of London," "Miniature Portrait Painting," etc.

— "Papers in Penology, second series," is a little pamphlet compiled by an inmate of the New York State Reformatory, and printed and stitched by other inmates of the same institution. It contains papers from various authors on the subject of prison re-

form, most of which have been published in some form before. It opens with three articles on the prisons of Great Britain, originally contributed to the *New York Times*, by Jay S. Butler; and these are, perhaps, the most interesting in the whole collection. The other papers are on various aspects of the prison reform question, and written by Charles A. Collin, William T. Harris, Hamilton D. Wey, and Eugene Smith; while the last one of all is an account of "the Elmira Reformatory of To-day," by the editor of the pamphlet. This last is somewhat marred by a peculiar and rather grandiloquent style, but otherwise it is an excellent description of the reformatory methods now practised under the prison laws of the State of New York. Some of the writers carry their zeal for prison reform to an extravagant degree, and Mr. Collins in particular actually says in his last sentence that "the object of criminal punishment is the improvement of the offender." On the whole, however, the views here presented are sensible, and persons interested in the subject will like to possess the pamphlet.

— Harper & Brothers have just published "Pharaohs, Fellahs, and Explorers," by Amelia B. Edwards; and "Sharp Eyes, a Rambler's Calendar of Fifty-two Weeks among Insects, Birds, and Flowers," written and illustrated by W. Hamilton Gibson.

— Mr. J. H. T. McPherson has prepared a brief "History of Liberia," which will doubtless be of interest to students of the

negro problem. It opens with an account of the earliest and unsuccessful attempts to plant a negro colony in Africa, and then proceeds to trace the leading events in the history of Liberia from its foundation to the present time. The difficulties and distresses of the past few years having been surmounted, the colonists have had considerable time to show what they are capable of and what may be expected of them in the way of government and civilization; but, unfortunately, their record is not so good as might be wished. Mr. McPherson defends them as well as he can, but he is obliged to admit that they have incurred a public debt, the interest of which they are unable to pay, and for which they have nothing whatever to show. Moreover, their presence in Africa has not as yet had any practical influence in civilizing the natives; and all attempts to propagate Christianity among the native tribes have proved unavailing, while Mohammedanism is spreading among the same tribes with great rapidity. On the whole, it would be neither surprising nor regrettable if, as Mr. McPherson

fears, the little republic should eventually be brought under the sovereignty of Great Britain. Mr. McPherson's pamphlet is published by the Johns Hopkins Press, at fifty cents.

— It is not, says *Iron*, generally known that the light of the sun and the moon exercises a deleterious effect on edge tools. Knives, drills, scythes, and sickles assume a blue color if they are exposed for some time to the light and heat of the sun; the sharp edge disappears, and the tool is rendered absolutely useless until it is retempered. A similarly prejudicial effect has been exercised by moonlight.

— Steps have been taken, we learn from *The Publisher's Weekly*, to establish an "Authors' Museum" in St. Petersburg, to contain mementos and relics of famous Russian literary men and women. It is probable that the Puschkin Museum in the Lyceum, and the Sermontoff Museum in the Nikolai Cavalry School, will be incorporated in the new institution, if completed.

A Tonic

Horsford's Acid Phosphate.

A most excellent and agreeable tonic and appetizer. It nourishes and invigorates the tired brain and body, imparts renewed energy and vitality, and enlivens the functions.

Dr. EPHRAIM BATEMAN, Cedarville, N. J., says:

"I have used it for several years, not only in my practice, but in my own individual case, and consider it under all circumstances one of the best nerve tonics that we possess. For mental exhaustion or overwork it gives renewed strength and vigor to the entire system."

RACES AND PEOPLES.

"The book is good, thoroughly good, and will long remain the best accessible elementary ethnography in our language."—*The Christian Union*.

"We strongly recommend Dr. Brinton's 'Races and Peoples' to both beginners and scholars. We are not aware of any other recent work on the science of which it treats in the English language."—*Asian Quarterly*.

"His book is an excellent one, and we can heartily recommend it as an introductory manual of ethnology."—*The Monist*.

"A useful and really interesting work, which deserves to be widely read and studied both in Europe and America."—*Brighton (Eng.) Herald*.

"This volume is most stimulating. It is written with great clearness, so that anybody can understand, and while in some ways, perforce, superficial, grasps very well the complete field of humanity."—*The New York Times*.

"Dr. Brinton invests his scientific illustrations and measurements with an indescribable charm of narration, so that 'Races and Peoples,' avowedly a record of discovered facts, is in reality a strong stimulant to the imagination."—*Philadelphia Public Ledger*.

"The work is indispensable to the student who requires an intelligent guide to a course of ethnographic reading."—*Philadelphia Times*.

THE MODERN MALADY; OR, SUFFERERS FROM 'NERVES.'

An introduction to public consideration, from a non-medical point of view, of a condition of ill-health which is increasingly prevalent in all ranks of society. In the first part of this work the author dwells on the errors in our mode of treating Neurosis, consequent on the wide ignorance of the subject which still prevails; in the second part, attention is drawn to the principal causes of the malady. The allegory forming the Introduction to Part I. gives a brief history of nervous exhaustion and the modes of treatment which have at various times been thought suitable to this most painful and trying disease.

IV. THE CHEROKEES IN PRE-COLUMBIAN TIMES. By CYRUS THOMAS.
12^o. \$1.

Dr. Thomas has already presented to the public some reasons for believing the Cherokees were mound-builders, but additional evidence bearing on the subject has been obtained. A more careful study of the Delaware tradition respecting the Talleghy satisfies him that we have in the Bark Record (*Walam Olum*) itself proof that they were Cherokees. He thinks the mounds enable us to trace back their line of migration even beyond their residence in Ohio to the western bank of the Mississippi. The object is therefore threefold: 1. An illustration of the reverse method of dealing with prehistoric subjects; 2. Incidental proof that some of the Indians were mound-builders; 3. A study of a single tribe in the light of the mound testimony. This work will be an important contribution to the literature of the Columbian discovery which will doubtless appear during the coming two years.

"A valuable contribution to the question, 'Who were the mound-builders?'"—*New York Times*.

"Professor Cyrus Thomas undertakes to trace back the evidences of a single Indian tribe into the prehistoric or mound-building age."—*N. Y. Sun*.

"An interesting paper."—*Christian Union*.

V. THE TORNADO. By H. A. HAZEN.
12^o. \$1.

"The little book is extremely interesting."—*Boston Transcript*.

"A book which will find many readers. The chapter on 'Tornado Insurance' is of interest to all property-holders in the tornado States."—*Boston Herald*.

"The Tornado" is a popular treatise on an important province of meteorology, in which science, the author, Professor Hazen of the United States Signal Service, may be regarded as an expert."—*Philadelphia Ledger*.

VI. TIME-RELATIONS OF MENTAL PHENOMENA. By JOSEPH JASTROW.
12^o. 50c.

"All students of psychology will find the book full of interesting facts. Professor Jastrow's good qualities as a thinker and as a writer are too well and too widely known to require comment."—*Public Opinion*.

"A useful work for psychologists—as well as the general reader—by setting forth in brief and easily intelligible form the present state of knowledge in regard to the time required for the performance of mental acts."—*The Critic*.
